MARITZA BOND, MPH
DIRECTOR OF HEALTH

City of New Haven Health Department
Public Health Emergency Information – Detention Facilities

Before a COVID-19 outbreak occurs in your community: Plan

A COVID-19 outbreak could last for a long time in your community. Depending on the severity of the outbreak, public health officials may recommend community actions designed to help keep people healthy, reduce exposures to COVID-19, and slow the spread of the disease. Local public health officials may make recommendations appropriate to your local situation. Creating a plan can help protect your health and the health of those in your community in the event of an outbreak of COVID-19.

WHAT TO KNOW

What is coronavirus disease 2019 (COVID-19)?

Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

How does COVID-19 spread?

The virus is thought to spread mainly from person-to-person.

- Between people who are in close contact with one another (within about 6 feet).
- Through respiratory droplets produced when an infected person coughs or sneezes.

These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs. It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

What are the symptoms of COVID-19?

Patients with COVID-19 have had mild to severe respiratory illness with symptoms of fever, cough, shortness of breath.

WHAT TO DO

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus. However, as a reminder, CDC always recommends everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.
- Follow CDC's recommendations for using a facemask.
 - CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory diseases, including COVID-19.
 - Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others.

- Wash your hands often with soap and water for at least 20 seconds, especially after using the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
 - If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- Encourage correctional staff to stay home from work if they feel sick.
- Hang health alert/cover your cough signage in health care areas and
- Designate an area for persons with symptoms to remain separated from other staff and inmates.
- Ensure that Personal Protective Equipment (“PPE”) is available and staff is trained in its use.
- Consider adapting pandemic plans for COVID-19.
- Consider screening of all new inmates for possible risk factors and symptoms of the illness.

IF A STAFF MEMBER HAS SYMPTOMS OF AN ACUTE RESPIRATORY ILLNESS

The staff member should call their healthcare professional if they develop symptoms and have been in close contact with a person known to have COVID-19 or have recently traveled from an area with widespread or ongoing community spread of COVID-19. See the CDC website for information on areas affected by Coronavirus. The Health Department can also assist with directing you to care.

Remind staff members to call ahead before visiting their healthcare provider.

IF AN INMATE HAS SYMPTOMS OF AN ACUTE RESPIRATORY ILLNESS

Any inmate with respiratory symptoms should be isolated from other inmates and staff. Evaluation by medical staff should take place as soon as possible. Screening questions should include whether they have been in close contact with a person known to have COVID-19 or have recently traveled from an area with widespread or ongoing community spread of COVID-19. See the CDC website for information on areas affected by Coronavirus. The Health Department can also assist with directing you to care.

FOR MORE INFORMATION

If you think you have symptoms consistent with Coronavirus, please call

New Haven Health Department Emergency Line

Telephone (203) 946-4949
