

CONH Contact Tracing Workflow

Supervisors are notified of a positive case or exposure and should conduct Contact Tracing following the workflow below.

CONH Contact Tracing Workflow

Updated 8/25/21

Supervisor notified of Positive Case or Exposure

Supervisor advises individual of need to self-isolate and begins identifying close contacts

Supervisor completes VEOCI reporting form

NHHD contact tracers conduct contact tracing for staff cases and contact

NOTE: These steps should be followed for both vaccinated and unvaccinated persons. If asymptomatic, fully vaccinated individuals do not need to quarantine prior to testing. See Covid-19 Guidance Documents for return-to-work criteria and close contact definitions.
